Highly Confidential - Attorneys' Eyes Only

3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	reason something that's not state-of-the-art may impede sales. As an additional factor, I just would point out that as far as I understand and it should be easy to find more information about it there are various manufacturers of wireless networking hardware, and one may be substitutable for another. Q. So having a 3G air interface or above is also the basis for consumer demand for Android products? A. I think I've explained the importance of that factor. Q. Is it more or less important in the patents patents-in-suit, sir? A. Well, one factor that comes to mind and	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	You may proceed. Q. BY MR. PAIGE: Welcome back, Professor Mitchell. A. Thank you. Q. You say that the Oracle employees Landau, Poore and Vandette conducted certain experiments at your direction; correct? A. I believe that's what it says in that report. Q. Why did you choose to use Oracle employees rather than an independent consulting firm? A. I believe that I asked if it was possible to get someone to help with some kinds of experiments like that or perhaps someone asked me if I knew students, and I suggested that perhaps someone who works for Oracle could be one possibility of doing that. Q. Are there no consulting firms capable of
	there may be others that would occur to me on reflection is that there is I believe a some degree	18 19	doing the type of work that those employees did? A. There may be. I didn't I didn't research
